

## Clean Water Act (CWA) Compliance Modules

The NPDES module tracks National Pollutant Discharge Elimination System (NPDES) permits and maintains parameter limit and discharge monitoring reports (DMR) for compliance with the reporting requirements under the Clean Water Act. The PERMIT module is indispensable for tracking all permit compliance activities and dates. Add the TASK MASTER module to manage all your environmental activity and project schedules.

NPDES

stand-alone module

The NPDES module manages outfalls, permit parameters, parameter limits and test data for pretreatment, industrial water, wastewater or stormwater permits.

Tracks analytical sample results for discharge calculation.

Generates daily, monthly and annual discharge monitoring reports (DMR), trend analysis and many other reports.

NPDES module screen:

Manage permits, limits and outfalls.

Track sample results, generate DMR reports and much more.

Generate DMRs for compliance with NPDES permits.

Integrates with other MIRSTM modules: integrates with FORM R by producing annual release summary to water for SARA 313/Toxic Release Inventory reporting.

PERMIT

stand-alone module

Organizer for permit compliance activities and information including scope, status, monitoring and reporting specifications; tracks critical dates for follow-up and renewal.

Produces reports for upcoming events.

Automatically alerts you of renewal deadlines.

TASK MASTER

add-on module

Any stand-alone module is required for this module

The versatile TASK MASTER module tracks tasks and activities, priority and recurring tasks; updates completion status.

Generate email notifications and automatic reminder messages of future tasks and deadlines.

Customized deadline reminder: users can set reminder frequency, priority, and reminder message at different levels of system access.

Each activity can be logged system-wide or for selected facilities.

Assign task responsibility to all users, selected users, or supervisors.

Print reports of scheduled tasks, outstanding tasks, tasks by assigned responsibility.

Keeps an audit trail for all task entries with who/ what/when/why.

Detailed agency information can be logged for each activity.

Integrates with other MIRS™ modules for tracking predefined environmental tasks.
